Education Made Easy

VIRTUAL CLASSROOM

# INTRO DUCTION

**eduzee** School Management System is a result of research and development for nearly a decade in the academic and technical fields, the first of its kind in the intelligent processing of digital data (Artificial Intelligence) in the world of software dedicated to schools, in order to develop the educational process. The first of its kind that covers all the school departments.

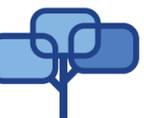

**eduzee** helps in determining the level of student academic and behavioral through a series of programming algorithms that analyze and address the entries of the student and faculty and administrative automatically and then display detailed academic reports.

# MISSION AND VISION

**Mission:** Technology has become a cornerstone and a necessity for our schools, it is therefore crucial to implement this development in the learning experience. This can be most effectively achieved through a platform that assists the various stakeholders—teachers, administrators, students and parents—in assessing and communicating their needs and realizing their potential.

**Vision:** Contribute to the development of the educational process through the use of the latest technology available simply and effectively.

# AIMS

**Improving The Communication** between home and school by  
Creating several communication tools:

- 1- Messages
- 2- Notes
- 3- Notifications
- 4- Visit Tickets

**Liberating the teachers** of tedious administrative tasks and allowing them to focus primarily on the pedagogic aims by Automating many procedures (Grading homeworks, assigning quizzes)

**Overcome The students' Individual Differences** through Assessment standards module, to locate talented students in certain subjects.

**Delivering Processed Facts** (Information) rather than raw unorganized facts (Data).

**Enhancing Information Sharing** by allowing students and parents easy and on-demand access to a plethora of relevant details:

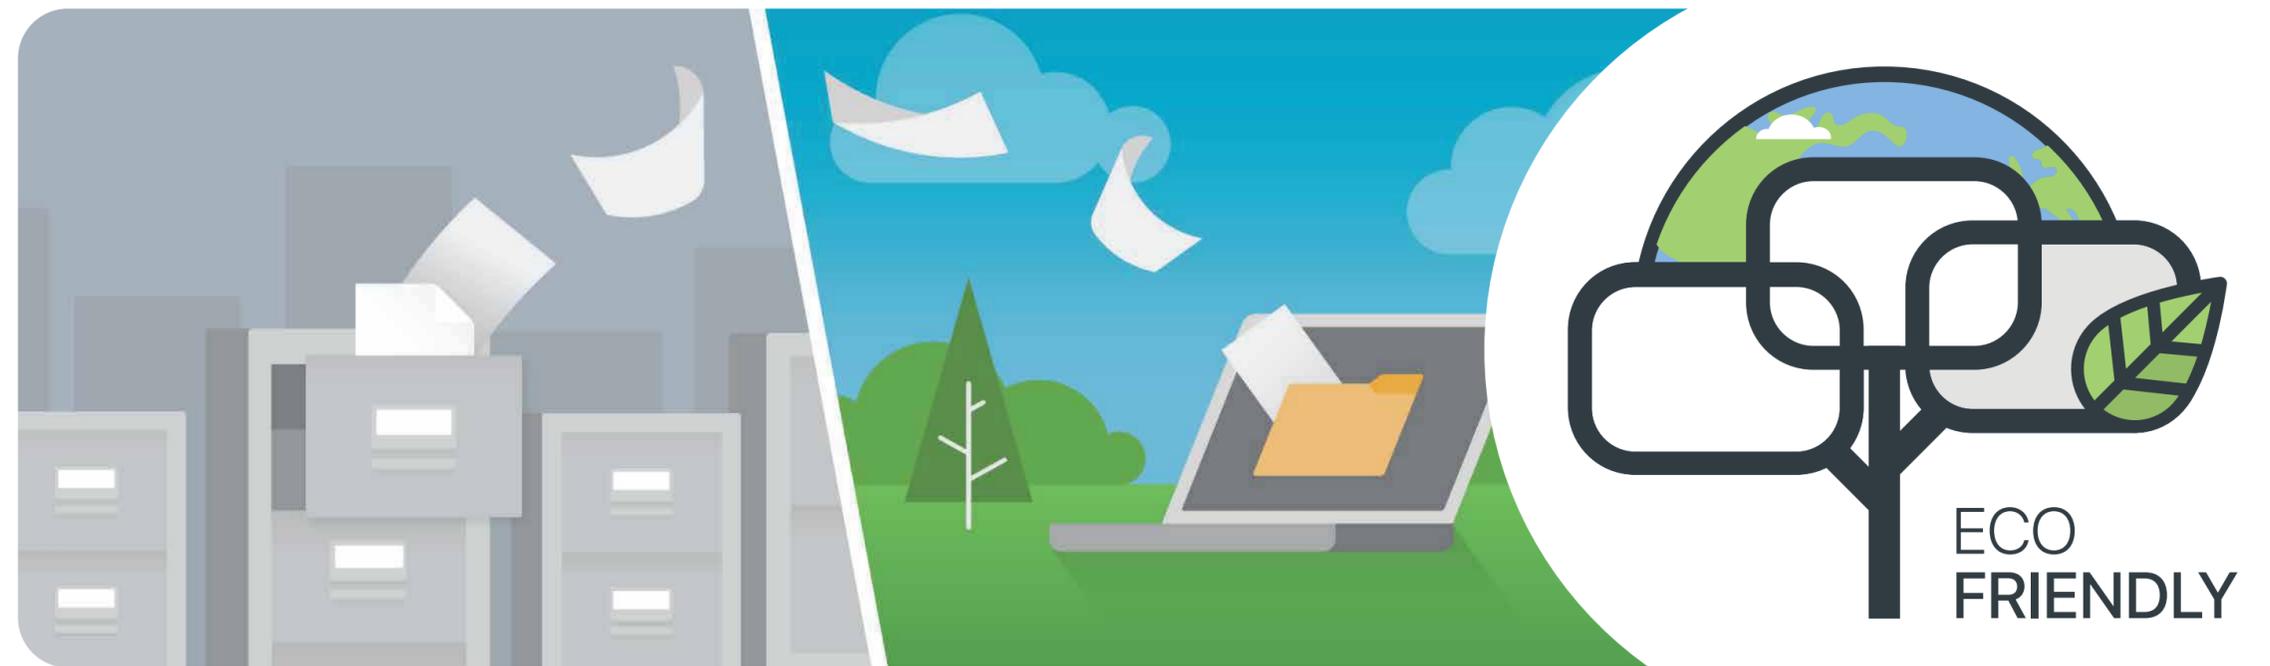

**Simplifying Administrative Tasks** by allowing the school to deliver all necessary information electronically

**Reducing** the logistical and administrative costs to the school.

**Provide real-time And On Demand Reports And Charts.**

**Provide a Paper-Free,** eco-friendly working environment

# Features

## **Safety Concerns and Distance Learning:**

Due to the recent events and the unfortunate outbreak of COVID-19, and complying with the recommendations of the MoE and MoH in Saudi Arabia, and due to the fact that our children safety is our main concern, we are providing distance learning platform which includes the necessary modules for learning, evaluating and following up with the students from home.

## **Learning content repository:**

EduZee provides an easy to use and powerfully indexed educational material content system that can be published, shared and viewed via any modern browser. The content may be used in our Online Interactive Board and Virtual Classroom modules.

The contents can be inserted as PDF's, Text or even scanned, once inserted to the platform it is automatically indexed and all what the entry personnel needs to do is to link the main chapters to the learning outcomes in the directory. Once this operation is set, any query on any learning outcome will get all the related documents and references from the repository and view them in the learning material section.

## Virtual Classroom:

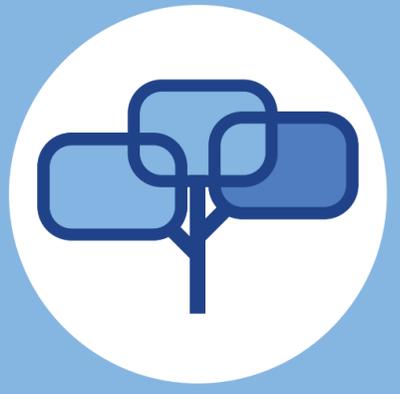

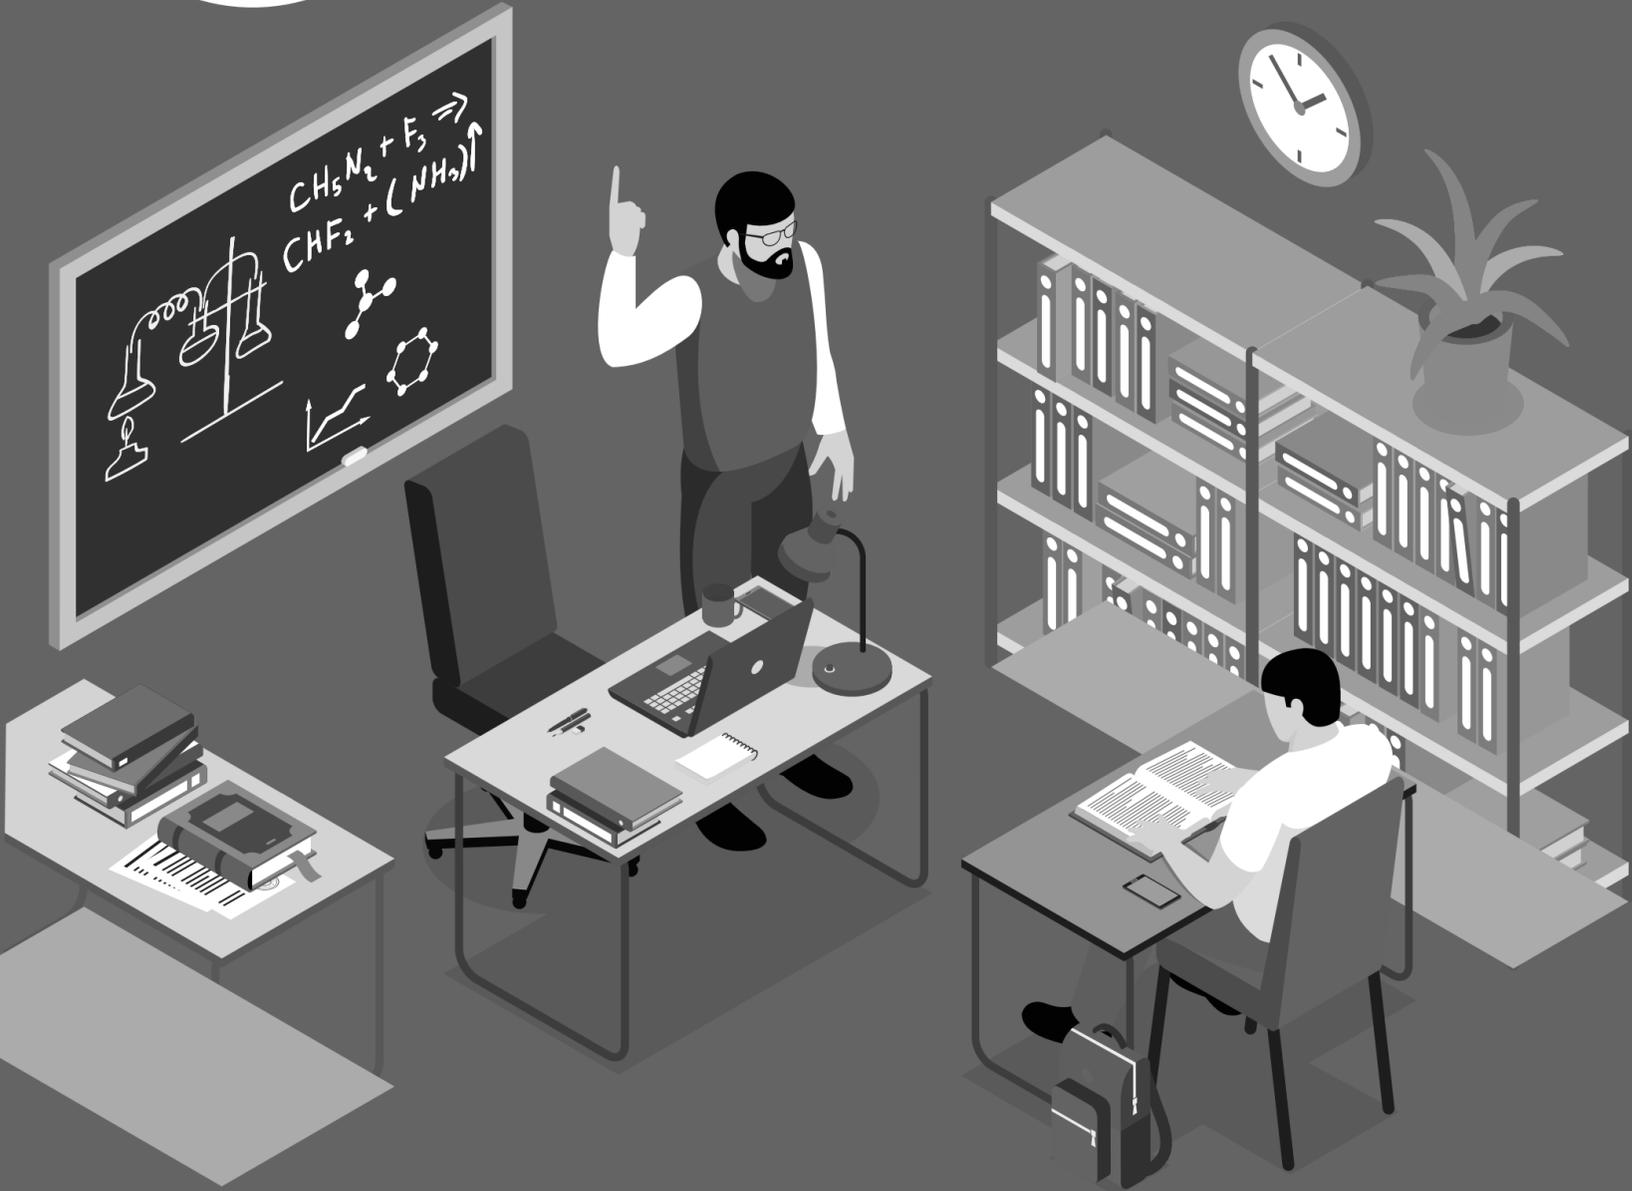

A camera, a laptop and an internet connection, that's all what the teacher needs to create a new virtual classroom, the Virtual Classroom module comes along with our powerful Online Interactive Board as a learning tool, teachers can grab any document and show it on the screen side by side with the video, then draw, edit, add notes on the document easily by using any of the marker tools within the dashboard.

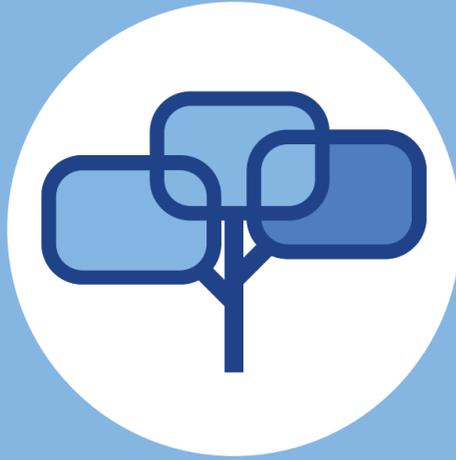

The Virtual Classroom module is a two-way learning tool as instructors and teachers may engage with the online attendees at any time within the session, allowing any of them to be a co-presenter to answer question or provide a discussion point.

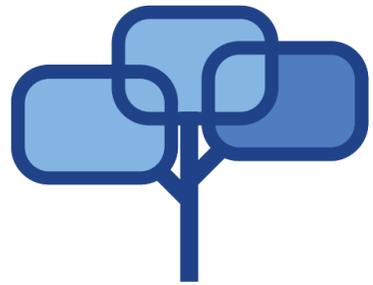

All created classrooms are automatically recorded and uploaded to the shared portal where students and parents can review at any time. They can also download the material and export in various formats and resolutions.

# Traditional Teaching

# Minute By Minute **Attendance**

A vertical list of six items, each consisting of a square checkbox on the left and horizontal lines on the right. The first three items have a blue checkmark inside their checkboxes, while the last three are empty. The horizontal lines vary in length and thickness, representing a checklist or attendance record.

## Online Interactive Whiteboard:

EduZee offers a complete interactive whiteboard which allows teachers to use in classrooms while students may view the lesson contents digitally via iPads/Tablets in which they can interact with it as well. Teachers may draw, highlight, add notes or shapes to help addressing the information and pass the knowledge to the students in an easier way.

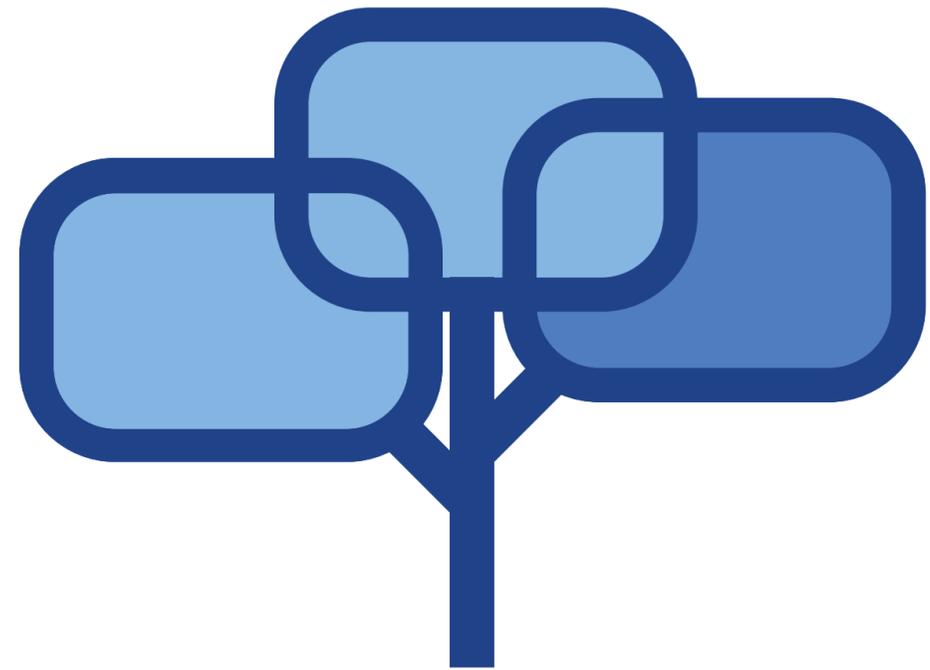

# List

of Features

- 1- Create Temporary and Permanent classrooms.
- 2- Complete integration with LMS (Learning Materials, Contents, Assessments).
- 3- Audio/Video capabilities.
- 4- Automatic notifications (Email, SMS) with one-click login to the created class session.
- 5- All sessions can be automatically stored and shown on teacher, student and parent pages within the portal.
- 6- Public and Private text chat sessions.
- 7- Shared Notes that teacher can include within the session for all students.
- 8- Ability to share from 3 different sources:
  - a - Presentation materials (PDF, Word, Images...etc).
  - b - Webcam / Professional Camera.
  - c - Shared video from outside source (YouTube).
- 9- Ability to upload contents during the session.
- 10- Laser pointer.
- 11- Ability to draw, write text on the presentation.
- 12- Teachers can allow students to write on the board or talk in the class.
- 13- Teachers can instantly take back control at any time.
- 14- Student may send emojis (Raise hand, Confused, Thumbs Up...etc).
- 15- Integrated with Eduzee Attendance Module.
